# Stone Garden Geo Park

Previously known as Pasir Pawon for its location at the top of Mount Pawon, you can feel the ancient nuance of Stone Garden Geopark Citatah. The formation of giant rocks dominates the panorama of this area. It is because the limestone mountains that stretch along Citatah are closely related to the ancient lake that inundated Bandung in the old times. Bandung is a giant basin as a remnant of the receding lake. Here, you can find a wide variety of coral fossils because Bandung highlands were once shallow waters. Those fossils then piled up in one place and turned into big limestone rocks. Now the combination of those karst rock compositions and the surrounding greeneries offer a magnificent panorama for you to witness and capture.

Food and coffee, both are good. Come early to get a good breakfast and nice atmosphere at Two Hands Full.
